P1	Making sketch for the prototype build plan	2026-10-03	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two, the same. Saw 10 x 6 mm bar to 200 mm; square the ends.
Lay it 6 mm side down. Mark a centre line 5 mm from each edge.
Holes 4.5 mm on the centre line at 7, 25, 70, 130 and 190 mm from the rear end (X = -93, -75, -30, 30 and 90 mm).
Deburr; break every edge lightly. The outer 6 mm face lines up with the long edge of the core plate.
Check: lay it under the plate and look through all five holes.
